

Hägglunds Original Service

Your assurance of drive quality, function and lifetime

Service specialists, backed by a worldwide organization

Safeguard the quality, lifetime and function of your direct drive system with Hägglunds Original Service from Bosch Rexroth. Our highly trained service specialists provide complete services that cover all our products and related components.

Maximize uptime, secure machine availability

Like any other piece of precision equipment, Hägglunds direct drives require occasional maintenance and re-adjustments by skilled and qualified service specialists. Hägglunds direct drive systems have been part of Bosch Rexroth since 2008, and we have a wide offering of services and support to secure their peak efficiency and performance. We offer complete original service for all our products and related components, designed to keep them operating reliably year after year. For qualified service and support of your Hägglunds direct drive system, contact Bosch Rexroth service.

Service Specialists with the right knowledge and tools. Backed by a worldwide organization.

Bosch Rexroth has a number of service offices and workshops throughout the world. Our service specialists are experts when it comes to Hägglunds direct drive systems, with the right knowledge and tools to ensure lasting drive performance.

Why does Bosch Rexroth offer Hägglunds Original Service? Doesn't Hägglunds exist anymore?

Hägglunds direct drives are alive and well. The products and their high quality are exactly the same as before. However, Hägglunds Drives as a company was bought by Bosch Rexroth in 2008. Since then, all Hägglunds products are part of the Bosch Rexroth product range. This is why Bosch Rexroth service specialists are the experts on Hägglunds direct drive systems.

What do I gain by contacting service specialists from Bosch Rexroth?

Our service specialists have undergone extensive training and are certified for the service of Hägglund direct drives and other Bosch Rexroth products. They have both the latest technology and the latest information from R&D, as well as the backing of our production plant.

What distinguishes Original Hägglunds Spare Parts from other spare parts?

Original Hägglunds Spare Parts are delivered new from our production plant and have the same high quality as all other Hägglunds products from Rexroth. This is the only way to guarantee the function, quality and service life of your direct drive system. They need to be installed by trained Bosch Rexroth service specialists using special tools.

What can happen if I don't use new Original Hägglunds Spare Parts?

You may experience downtime and additional cost. You have no way of knowing if other parts have been exposed to stress or wear, or if they are in tune with the rest of the system and the latest recommendations. If you receive a

faulty part or use one of the many older parts on the market, it can cause problems in your system that may extend to other equipment. Our service specialists have products directly from R&D, plus the latest information and the know-how to perform a correct installation.

Why do Bosch Rexroth service specialists need special tools? Can't ordinary tools be used to service the equipment?

Bosch Rexroth products have a rugged design, but their leading-edge technology involves a great deal of workmanship. The special tools have been developed by our production plant and are necessary to maintain your product's performance. In the hands of our skilled service specialists, who undergo extensive training, they help to guarantee the service life of your investment.

What makes Bosch Rexroth service workshops unique?

Our service workshops are clean, neat and well equipped. They meet all quality requirements and have the specific tools needed for working with Hägglunds direct drive systems.

What is the easiest way to contact Bosch Rexroth for service of my Hägglunds direct drive?

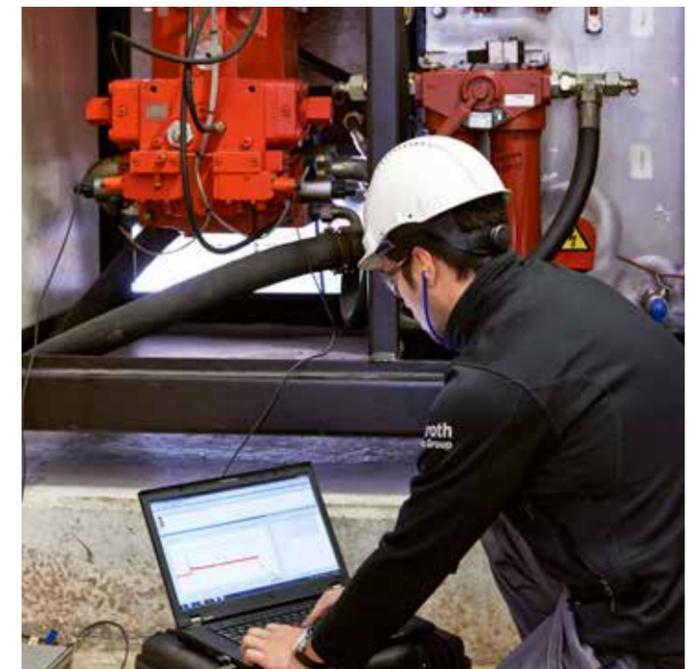

You can always reach us via the Bosch Rexroth global service pages on Internet. This is the fastest and easiest way to get the help you need.

Henrik Nilsson

Director Aftermarket, Hägglunds Products

Certified Service Specialists offering a wide range of service options

Quick assistance from certified service specialists

Every minute is vital when you have a production stoppage. Calling Bosch Rexroth puts you in immediate touch with support for your Häggglunds direct drive system. No matter where you are, our local service specialists have a full understanding of our products and your situation. They resolve the issue so you can concentrate on what's important – your production.

New Original Häggglunds Spare Parts

Service specialists from Bosch Rexroth use only new Original Häggglunds Spare Parts. You can thus rest assured that your drive system will retain its high quality, performance and function.

The right set of tools

Our service specialists look after your Häggglunds direct drive at Bosch Rexroth's well-equipped service workshops. Here we have not only all the knowledge, but also the

correct and specialized tools to care for your product. This ensures that your drive stays up to standard and up to date with the latest improvements and technology.

Modernization and upgrades

Häggglunds direct drive systems are flexible solutions with a modular design. This makes them easy to modernize or upgrade as your production needs change. Our service specialists are in close contact with our R&D department and the Häggglunds production plant in Sweden, from whom they receive full backing. So to modernize or upgrade your system, begin by contacting Bosch Rexroth's service hotline for assistance and support.

Maximizing uptime with Performance Agreements

To get the most out of your Häggglunds direct drive system, consider a Performance Agreement with Bosch Rexroth. Performance Agreements provide a range of proactive services, thereby ensuring your uptime.
